

## **Long term savings operations: keeping pace in an evolving market**

**5 May 2020  
13:00-14.30**

Is your firm's data, tech and governance fit for the future? The everchanging landscape of the long-term savings industry creates challenges in identifying and meeting operational priorities. Innovation has the potential to disrupt the status quo and ensuring compliance with complex regulation means firms will need to be flexible and forward thinking in order to remain relevant to customers and to meet their expectations. Policy and cross-industry infrastructure also need to keep pace with an evolving market.

Whether preparing data for pensions dashboards, embedding ESG or ensuring that systems have the capacity to withstand myriad external shocks, the need for long-term savings firms to understand risks and opportunities and prioritise resources will continue to be critical to ensure commercial success and good outcomes for customers.

Join the debate to explore how an industry built on assessment of risk can ensure it has the ecosystem in place to embrace change and uncertainty. This webinar will bring together industry experts, policymakers and regulators across multiple disciplines to debate the priorities firms should adopt, and consider how they can meet them.

12:55	<b>Registration</b>
13:00	<b>Welcome</b>
	<b>Yvonne Braun</b> , Director of Policy, Long-term Savings and Protection, ABI
13:05	<b>Keynote Address One</b>
	<b>Matt Warman MP</b> , Minister for Digital Infrastructure, Department for Digital, Culture, Media and Sport
13:15	<b>Keynote Address Two</b>
	<b>Simon Shaw</b> , Director, Trinity McQueen
13:30	<b>Keynote Address Three</b>
	<b>Chris Curry</b> , Principal of the Pensions Dashboard Programme, Money and Pensions
13:45	<b>Panel - 'Devils in the data'</b>
	<p>With the welcome news that pensions dashboards could soon become a legislative reality, the importance of data will become increasingly prominent. The quality of data and its security will be heavily scrutinised. This panel will explore the challenges the industry faces to get its data and tech into shape, so that it can deliver dashboards and priorities such as gone-aways, and more widely how providers are adapting in the increasingly digital world.</p> <p><u>Chair:</u></p> <ul style="list-style-type: none"> <li>• <b>David Miller</b>, Partner, KPMG</li> </ul> <p><u>Panellists:</u></p> <ul style="list-style-type: none"> <li>• <b>Chris Curry</b>, Principal of the Pensions Dashboards Industry Delivery Group, Money and Pensions</li> <li>• <b>Matt Dodds</b>, Director, ITM</li> <li>• <b>Alison Gammon</b>, General Counsel UK and Data Protection Officer, Aviva</li> <li>• <b>Kavi Myladoor</b>, Head of Propositions, Legacy, Royal London</li> </ul>
14:20	<b>Closing remarks</b>
