

Prudential Regulation Webinar: Life Beyond Solvency II?

19 May 2020

This event will now be delivered as a webinar

The ABI's annual seminar devoted to all the hot topics in the prudential regulation of insurance – with keynotes and insights from senior policymakers and practitioners.

The 2020 webinar will focus on the future of the UK's prudential regulatory regime as we move beyond the seismic shocks of Brexit and the Covid-19 pandemic. The webinar will cover the changes we may see in prudential regulation in the 2020s, the risks and opportunities that these may present, and how the regulatory regime may need to adapt to urgent external priorities. The need for a regulatory regime “that works” will be a theme, whether that be in encouraging investment in the current “low for long” yield environment, or in support of the transition to a low carbon economy.

Join us and be part of the discussion.
